Dear Parents / Carers,

White Rose Home Learning Guidance for Parents and Carers

From the feedback received so far, most parents and children are enjoying the maths home learning, following the White Rose scheme. The scheme has proved to be very popular and as a consequence there has been a change to accessing the work sheets that accompany the video clip. In line with consistency, ease and support, school has subscribed to the premium access, to allow our children and yourselves continuity and stability.

Please do not make an individual purchase to access the resources.

I am aware that some of you are up-to-date with the White Rose lessons but when we started to use the resource, we asked you to go back to the beginning so you may not yet have noticed a change in delivery. This occurs from summer week 4. To help with this, when we next set out our home learning you will watch the clips as normal on line but the accompanying worksheets will be found on the 'At home learning' pages for your class. Again, we are very aware of the photocopying cost of printing these out and don't expect you to do this, the children can use them and record their answers and working out as they have been doing so far.

This will be the link page we will upload with the accompanying work sheets. I will also ask teachers to look at other activities, as we now have the premium access.

You are all doing a fantastic job and, as always, we are here to help and support you in any way we can. Remember to email us at together@bucktonvale.tameside.sch.uk if you have any concerns or questions. Many children may now be covering new concepts that they may not have covered before, if they are struggling, do not worry we are all working together and we will work with you and your child to address concerns you may have.

Thank you again for your continuing dedication and support during these difficult times.

Kind regards,

Mrs Blake
Leader of Mathematics
